**GEN. GRANT'S PROPHECY.**  
Austin Statesman.  
It will be quite interesting at this time to note that Gen. U. S. Grant while making a tour around the world in 1877 pointed with prophetic finger to the very problem that this country is discussing at the present time, viz: the tariff. During that year he made quite a number of speeches and in one of them he said:  
"Now, this is one subject that has been alluded to here that I do not know that I should speak upon at all. I have heard it occasionally whispered since I have been in England, and that is the great advantage that would accrue to the United States if free trade should only be established. I have a sort of a recollection, through reading, that England herself had a protective tariff until she had manufactures somewhat established. I think we are rapidly progressing in the way of establishing manufactures ourselves, and I think we shall become one of the greatest free traders on the face of the earth; and when we both come to be free traders I think that probably the balance of nations had better stand aside, and not contend with us and in the markets of the world."  
This prophecy is even now coming true and within the next four years the United States will have free trade world without end. When that time comes watch and see if Grant's other prophecy, that the world will have to bow to us and England, does not come true.  
He: Do you think your father would object to my marrying you? She: I don't know. If he's anything like me he would.—Life.
